

NIMROD LEVY

Unreal Engine Developer

Personal details:

Cell: +972-526383309

E-Mail: bambil86@gmail.com

LinkedIn: www.linkedin.com/in/nimrod-levy

Education:

February 2014 - July 2016: Tiltan college for design and visual communication, Game design.

Game Development

- **Dwarven Realms (Shipped) / ARPG / UE5 / 2025**
 - Core systems (C++ and Blueprints)
 - Data-driven gameplay frameworks
 - Enemy AI refactor supporting player-controlled minions
 - Optimized large-scale enemy encounters to improve performance
 - Playable race systems (character-creation, passives, abilities)
- **Gravebound (Shipped) / Extractor shooter / UE5 / 2025**
 - Networked gameplay systems (C++ / Blueprints)
 - GAS and Lyra framework extension
 - Server-Side inventory persistence across death or extraction
 - Modular weapon and armor upgrade system (visual changes, unlockable skills and server-authoritative cost validation)
- **Divided Moon (unreleased) / Mobile game / 2019**
 - Sole developer – gameplay and engine-side systems
 - In-Engine custom shaders and visual effects
 - Player-controlled terrain manipulation physics solution

Television

- **Stepper / Gamechanger's in-house plugin / 2018-2024**
 - Architected and developed a deterministic, frame-accurate rendering framework for Unreal Engine
 - Custom engine time control (delta time override)
 - JSON-driven event playback and pub/sub architecture
 - Enabled non-destructive virtual manipulation of timeline data during render execution
 - Offline rendering via integrated FFMpeg (90+ FPS @ 4K)

Produced shows using the Stepper framework

- **Beat The Grid** (Unreleased).
- **Family Piggy Bank** (Aired).
- **Bingo Blitz** (Aired).
- **Tic Tac Dough** (Aired).
- **2025 / Israeli reality show / Robot control software / 2019**
 - Real-time facial capture → virtual avatar mapping
 - Operator UI for live control and camera feedback
 - Robotic head control with joystick override
